Dreer's Gladioli
Gold Medal Mixtures

We have these in three distinct color sections, and also in a general blend of all the colors together. They are not merely surplus lots thrown together, nor are they bulbs that have been grown in mixture, a practice that soon leads to an excessive proportion of a few of the more prolific sorts. Our Gold Medal Mixtures are made up of highest quality, large flowering named varieties, blended to give a proper balance of the various shades and yet cover the full color range of each section.

We offer only selected first size stock, no "seconds," for we believe the larger sized bulbs will give more complete satisfaction, whether handled for forcing or grown out-of-doors.

Dreer's Extra Choice Tuberous-Rooted Begonias

The Tuberous Rooted Begonias which we are now offering are, of course, all American grown, produced for us by a specialist in this particular line. During the past five summers when they were at their best, we had the opportunity of looking these over, and were delighted to see the advances made in their production as well as with the superior quality of the various types, and we assure our customers that they can depend on receiving stock at least equal if not actually superior to what we have supplied in the past.

The tubers we send out are from 1¼ to 2 inches in diameter, the best size for all commercial purposes, be this for growing in pots or for outdoor bedding.

Frilled Tuberous-Rooted Begonias

If you have only been growing the ordinary plain-edged Begonias, you will be delighted if you will give this wonderfully improved strain a trial. The flowers are not only of giant size, but the petals are beautifully frilled and waved, not unlike the finest frilled or ruffled Petunias.

New Hybrid-Tea Roses and Varieties of Special Merit

The list offered under this heading embraces, besides the latest introductions and novelties, many of which are being sent out exclusively by us this season, such sorts of earlier introduction that are of special merit or that are still scarce and worthy of special attention by the planter.

New Hybrid-Tea Rose, *Caledonia*

Abol (F. Evans, 1927). An exceptionally vigorous growing, very free-flowering, new white. No other white variety, and for that matter, very few colored varieties, have such a delightful sweet perfume as this novelty. In the bud stage and before the flowers are fully expanded, the centre petals are sometimes tinted with pink on the edges of the petals, passing to pure white as the flowers develop. A good shapely bud and full, double, well formed flower. \$75.00 per 100.

Betty Sutter (McGredy & Son, 1929). Exquisite both in bud and fully developed flower, a great advance over the old favorite Mme. Abel Chatenay, long shapely bud and moderately large full double high centered flower of tea perfume. In color the inside of the petals are of delicate rosy pink, the outside a bright rosy pink. As the flower opens there is a delightful reflecting of the petals which enhance the beauty of the pink tones by bringing each into bolder relief. \$75.00 per 100.

Caledonia (Dobbie & Co., 1928). Large, very long pointed conical buds with the edges of the outer petals gracefully rolled back; flowers very large and full double, high centre, slightly fragrant and borne singly on long strong stems. Color, when first expanding, slightly lemon tinted, changing to a pure white as the flowers develop. Habit very erect, of vigorous constitution, and a continuous free bloomer. \$75.00 per 100.

Charles P. Kilham (Beckwith & Sons, 1926). A brilliant distinct and striking novelty which will appeal to and please every Rose lover. The buds are long pointed of perfect shape, opening to high centered perfectly formed full double flowers of a rich and brilliant Oriental red, flushed with orange and glowing scarlet. A vigorous grower; very free flowering and sweetly tea-scented. \$100.00 per 100.

Dainty Bess (Archer, 1925). An appropriate name for a daintily colored and well formed single flower, 3½ inches in diameter composed of delicately crinkled and wavy petals of a pleasing shade of shell pink with a conspicuous bunch of crimson stamens. The flowers last well when cut and are charming when displayed in individual vases. A strong, vigorous grower and profuse flowering, the flowers being produced on strong stems. \$75.00 per 100.

Dr. Andrew Carnegie (Ferguson, 1927). A sport from the well known Mrs. Henry Morse, identical in every way except in color, which is of a light silvery pink with deeper reflex, yellowish at base. A strong vigorous grower and very free. \$75.00 per 100.

Dr. Edward Deacon (Morse & Son, 1926). A variety that will charm every lover of a real good Rose. Its color is fascinating, the margin of the petals being a delicate tint of shrimp pink gradually merging to a deep salmon-orange towards the base of the artistically reflexed petals, forming a fine, very full flower. The habit of the plant is ideal, upright, strong and free flowering. \$75.00 per 100.

Duchess of Athol (Dobbie & Co., 1928). The coloring of this new variety is uncommon and delightful, an old golden-orange flushed with peach pink, particularly attractive in the bud and open state, growth vigorous, a free and continuous profuse bloomer. \$75.00 per 100.

Edith Nellie Perkins (Alex. Dickson & Sons, 1928). Entirely distinct in coloring and of such strong robust growth that it should succeed anywhere and produce an abundance of its pretty colored flowers. The buds are long and pointed, the outside of the petals are of cream and blush shaded with orange at the base, the inner face is salmon-pink with golden-orange base; the flowers are moderately double, produced on long stems and sweetly scented. \$75.00 per 100.

E. G. Hill (E. G. Hill Co., 1929). Among the many Roses raised by Mr. Hill we consider this new red variety one of the most valuable. While it has gained great popularity as a winter cut flower, it is equally good for garden purposes, the long buds of perfect form, as well as the high centered full double flowers are of a dazzling scarlet, shading to a deeper pure red as they develop; of strong vigorous and free flowering habit. \$75.00 per 100.

Elizabeth of York (Dobbie & Co., 1927). Beautifully formed long pointed buds of a glowing cerise-red with yellow suffusion at the base; the petals as they unfold spread widely with a splendid reflex ultimately showing the stamens. An artistic, dainty, delicately colored flower. \$50.00 per 100.

Emily Dodd (Alex. Dickson & Sons, 1927). Very large ovoid bud opening to a large, full double, high centered, very lasting, slightly fragrant flower of a milky white shaded cream in centre. These are borne singly on strong stems; foliage large, rich green; growth vigorous upright, bushy habit, a profuse bloomer; very hardy. \$75.00 per 100.

Etoile de Hollande (Verschuren, 1919). A brilliant crimson red, the best all around red bedding Rose yet introduced. A strong vigorous healthy grower and free continuous bloomer, flowers large, moderately double and beautiful in all stages of development. \$50.00 per 100.

Everest (Easlea & Sons, 1927). One of the largest Roses yet raised, buds large, perfectly shaped, flowers of immense size with long broad petals of firm texture, fragrant ivory-white with creamy suffusion and when fully developed resembles a large Peony borne on long stems. While awarded a Gold Medal by the National Rose Society of England in 1927 as a Hybrid-Tea, it has the characteristics of a vigorous growing Hybrid-Perpetual. \$50.00 per 100.

Evert Van Dyk (G. A. Van Rossem, 1931). With the many good pink Roses now in cultivation the standard to induce us to offer a new variety is naturally placed high, and we are convinced that in this new Dutch variety, which has been named by the introducer in honor of one of the sponsors of the trans-oceanic flight of the "Southern Cross," that we have a variety, which in its color, a bright rose-pink with salmon suffusion, and superior habits, we can recommend with full confidence. \$75.00 per 100.

New Hybrid-Tea Rose, J. C. Thornton

Flamingo (Alex. Dickson & Sons, 1929). Very pretty in bud form; these are long pointed of spiral form but open out quickly to semi-double sweet-scented flowers. Color bright geranium red passing to glowing rosy cerise as the flowers open. A strong, vigorous grower, free flowering. \$75.00 per 100.

Gaiety (E. G. Hill Co., 1926). Golden Dawn (P. Grant, 1929). A magnificent new Rose of Australian origin with which we have been most favorably impressed and in which we have an ideal garden Rose of great merit of an exquisite light lemon yellow color. Its buds are of an ovoid form, heavily splashed with crimson before opening and develop into splendidly shaped full double moderately fragrant flowers which are of a uniform color, reminding one of the old favorite Marechal Niel and which was suggestive of the name Golden Dawn. The plant is of strong, vigorous upright branching habit, very free flowering with usually three or more flowers on each branch. \$60.00 per 100.

Grass an Coburg (Felberg, Leclerc, 1927). A promising new variety with brilliant coppery orange red buds and large double, full, very fragrant flowers, of a brilliant combination of fawn, golden yellow and coppery red. A strong healthy grower and a perpetual bloomer. \$60.00 per 100.

Heinrich Eggers (W. Kordes, 1928). Well shaped long spiral buds and large bold full double high centered flowers of perfect shape. Color an orange tinted pink with yellow shadings at base. Very strong free flowering habit. \$125.00 per 100.

The ovoid buds when first unfolding are cardinal-red with orange suffusion and develop into very large, full double very perfect blooms that last in good shape and which are of a pretty salmon-cerise color suffused with a luminous golden sheen. The plant is a strong vigorous upright grower and exceptionally free flowering. \$75.00 per 100.

Ivy May (Beckwith & Son, 1925). One of the most attractive varieties of Ophelia type. Color a pretty rose pink running to amber at the base, flushed with gold on the outside and at the edges of the petals; glowing and sparkling. Buds of medium size, long pointed and shapely, opening to fairly double, well-formed, sweetly-scented flowers on long stems. Habit vigorous and upright; a very free and continuous bloomer. A splendid garden Rose and a beautiful cut-flower. \$75.00 per 100.

I. Zingari (J. H. Pemberton, 1925). The most vivid shade of orange scarlet that one can picture, rich and glowing; while the flowers are only semi-double it always attracts attention on account of its rich color and is worthy of a place in every garden. It blooms profusely and continuously, usually in sprays of several blooms; the glossy dark green foliage accentuates its vivid color. \$75.00 per 100.

James Gibson (McGredy & Son, 1928). A glorious glowing crimson-scarlet with velvety sheen, imparting a lustrous radiance to the large, full, beautifully formed flowers of which every bloom develops to perfection. Its habit of growth is as near perfect as could be desired, being free, bushy, upright and vigorous and the flowers which are borne profusely all the season, are carried erect on long stems with good disease resistant foliage. A brilliant Rose of exceptional beauty. \$75.00 per 100.

Jarvisbrook (Stuart Low, 1928). A splendid large full flower of a most dainty and effective color combination, carmine with orange reverse to petal. It is sweetly scented, of vigorous, upright, branching, healthy habit of growth and remarkably free flowering throughout the season. A meritorious Rose in every respect. \$75.00 per 100.

J. C. Thornton (Bees, 1926). A most brilliant bright glowing scarlet crimson with buds of exquisite form and fine, full, well-shaped high-centered flowers of great substance, borne singly on long strong stems; of vigorous, free, growth. It may prove to be our best red bedding variety. \$75.00 per 100.

Joan Cant (Cant, 1929). Reminds in form of the old favorite Mme. Abel Chateau. Jules Gaujard (Pernet-Ducher, 1928). Distinct and beautiful, the large, well-formed double flowers on first opening are of a glistening cochineal crimson which, as they fully develop, pass to a pretty shade of orange-rose. It is of strong, vigorous, branching habit, very free flowering and a variety that we are convinced will become a greatly admired garden Rose. **\$75.00 per 100.**

Konigin Luise (Queen Luise) (Weigand, 1927). An exceptionally large, full, globular, well built double, white flower that lasts a long time. Of strong, vigorous habit of growth with good healthy foliage. The flowers are carried erect on strong stiff stems. A splendid Rose for the garden and for cutting. **\$75.00 per 100.**

Lady Forteviot (B. R. Cant, 1928). A garden Rose that we confidently recommend. Large ovoid buds opening to very large, moderately double artistic well lasting flowers of delightful fruity fragrance of a bright golden yellow flushed with cardinal red, borne several together on long strong stems. Growth vigorous, healthy dark green glossy foliage, a hardy continuous bloomer. **\$75.00 per 100.**

Lady Leslie (McGredy, 1929). Some modern critics lament the absence of fragrance at the expense of vivid colors, but in the beautifully formed good sized flowers of Lady Leslie we have a combination of sweetest fragrance and brilliancy in coloring. In the early stages the flowers are rosy scarlet which, as they develop, passes to a scarlet-carmine suffused with saffron yellow on a yellow base, a warm glowing color combination particularly in the young state. The plant is of ideal bedding type with free upright bushy growth and healthy dark green foliage. **\$75.00 per 100.**

Lady Margaret Stewart (Alex. Dickson, 1926). A Rose of unique color, the flowers in the young stage are a deep sunflower-yellow heavily veined and splashed with orange-scarlet, reverse of the petals deeply suffused with carmine, as the flowers develop these colors intermingle forming a beautiful cadmium orange effect. The bud is long and pointed, opening to a full double flower of pleasing decorative form of delightfully sweet scent. **\$40.00 per 100.**

Lord Rossmore (Dr. J. Campbell Hall, 1928). Globular blooms of great size and of good substance. The outer reflexing petals are creamy yellow and the central mass of petals is variously tinted with salmon blush, flesh or pink and of delicate tea scent. The growth is very strong and free with good foliage. **\$125.00 per 100.**

Lucie Marie (Alex. Dickson & Sons, 1930). Very long pointed buds, deep yellow splashed with red. As the outer petals unfold, the inner face is yellow with coppery venation with the tips of the petals lightly tipped with pink, slightly fragrant. It is of strong vigorous healthy habit of growth with dark-leathery foliage. A most distinct and interesting bedding variety. **\$75.00 per 100.**

Margaret McGredy (McGredy, 1928). We consider this one of McGredy's masterpieces, large, beautifully shaped full double flowers, entirely distinct from all others in its rich coloring which is a brilliant shade of Turkish or Oriental red passing as the flowers age to a beautiful carmine-rose, these are borne on long stiff stems and hold their form and beauty for a long time. **\$40.00 per 100.**

Marion Cran (McGredy, 1927). The color combination is wonderful. In the young stage the color is deep buttercup-yellow, margined and flushed cerise and rosy-scarlet. As the flower opens the outside of the petals retain their color, while the inner side opens a brilliant geranium scarlet flushed and veined orange and yellow, passing to a deep cerise on bright rosy-scarlet flushed buttercup-yellow. The flowers are full, of nice form, and medium size. **\$50.00 per 100.**

May Weibern (Alex. Dickson, 1928). A magnificently formed bud and flower of moderate fullness and artistic coloring. The flowers are composed of immense, deep, wide petals of very solid texture, their formation making a beautifully built long bud and high pointed flower, in which the inner face of the petals evolves from a bright salmon pink in the bud to deep flesh pink; then to bright pink in the more developed flower; the outer side passes from deep rose to rosy pink and finally to bright rose, the blending of these tones creating a wonderful color harmony. Free flowering and fragrant. **\$75.00 per 100.**

McGredy's Scarlet. (McGredy & Son, 1930). A new red Rose of marked superiority on account of its strong vigorous growth free and continuous habit of flowering and its brilliant color. The flowers are of good size, full double of a brilliant scarlet, orangy yellow at base of petals, the upper portions of same being lightly touched with crimson, varying some in color under changing weather conditions but always beautiful. **\$75.00 per 100.**

Mevrouw G. A. Van Rossem (Van Rossem, 1926). A marvelously beautiful Rose with a unique color combination not found in any other variety, a most striking blending of dark vivid orange and apricot on a golden yellow ground with frequently touches of bronze on the reverse of the petals. The sweet-scented flowers are very large, of perfect formation both in the bud as well as in the fully developed flower and are produced very freely on vigorous upright growths. **\$75.00 per 100.**

Miss Rowena Thom (Howard & Smith, 1928). In vigorous habit of growth, freedom of bloom and in its adaptability to varied climatic conditions, this will prove equal to the popular Radiance Roses, while its flowers in size and form are equal to the best high-class varieties of recent introduction and all of which it will outclass in freedom of flowering. Its buds are long and shapely, opening to perfect double flowers frequently 5 inches across of a brilliant rose-pink, the base of the petals having a golden suffusion which as the fragrant flowers unfold, adds to the brilliancy of its coloring. **\$50.00 per 100.**

Mme. Henri Queuille (Pernet-Ducher, 1929). This splendid Rose in the formation of its large, full flowers, strong, vigorous, healthy growth and freedom of flowering reminds one of the same raiser's popular bedding variety, *Souvenir de Georges Pernet*, excepting in color which is much lighter, being a pretty shrimp or coral pink on an orange-copper base. **\$75.00 per 100.**

Mme. Nicolas Aussel (Pernet-Ducher, 1931). An outstanding this year's introduction of the late Mr. Pernet-Ducher. In color a bright coppery red in the very long, shapely tapering bud that develops into a large full double flower of an exquisite opalescent salmon pink. Growth vigorous and healthy, free and continuous bloomer. **\$75.00 per 100.**

New Hybrid-Tea Rose, Mrs. Erskine Pembroke Thom
The Best Yellow Garden Rose

Mrs. A. R. Barraclough (McGredy, 1926). A most distinct and valuable Rose, of a bright but soft sparkling carmine-pink of even tone that passes to yellow at the base of the petals; this attractive color does not fade as the flower ages, but if anything becomes richer and brighter. The bud is long pointed and develops into a full double flower of model form and substance; very fragrant. **\$40.00** per 100.

Mrs. Erskine Pembroke Thom (Howard & Smith, 1926). We are convinced that this is the best yellow bedding Rose we have to-day. It is of clean healthy vigorous growth with abundant dark bronzy disease-resisting foliage and a continuous free bloomer throughout the season. The medium sized buds are long and shapely and develop into good sized full double flowers of a rich deep lemon yellow, sweetly scented. **\$40.00** per 100.

Mrs. Henry Bowles (Chaplin, 1921). One of the best bedding varieties grown, always in flower and perfect in every stage of development. In color it is of an intense brilliant pink with lighter salmon pink shadings. A model Rose in every way. **\$40.00** per 100.

Mrs. Herbert Dowsett (Easlea, 1928). Originated as a sport from Los Angeles, large ovoid bud, large full double very lasting, well shaped, moderately fragrant flower. In color it is several shades deeper than its popular parent. Growth vigorous, bushy habit and a continuous bloomer. **\$75.00** per 100.

Mrs. John Bell (John Bell, 1928). A Rose of exceptional merit, of a most attractive vivid shade of cochineal carmine, with large long pointed shapely buds and very large full double cupped fragrant flowers borne singly on good stems. Growth moderate, bushy habit with disease resistant foliage and a profuse bloomer. A variety that is certain to become popular and which will displace all others of a similar shade of color. **\$75.00** per 100.

Norman Lambert (McGredy, 1926). A distinct color combination that is novel. The outside of the petals is a deep chrome-yellow with a marginal color effect of brilliant orange-scarlet merging to an irregular zone of burnt orange, the inside salmon-orange suffused bronze, shading to yellow at the base. The flowers are of medium size and form, delightfully fragrant. Free-flowering. A splendid bedder. **\$50.00** per 100.

Patience (McGredy, 1927). One of the finest Roses of recent introduction. Its splendid long pointed buds are of a deep scarlet carmine opening to large fragrant double perfect blooms that shade from orange at the base of the petals to rich carmine at the edges. It is of strong robust habit with glossy holly-like foliage and extremely free flowering for a Rose of its large size. **\$50.00** per 100.

Polly (Beckwith, 1927). A splendid Rose of the Ophelia type that we feel confident will become a general favorite. Buds long and of perfect shape, the centre golden yellow passing to a tender flushed pink towards the edges; as the large full fine flowers develop the golden base comes well up on the petals, the outer petals pass to a creamy white with just the faintest touch of pink. A strong healthy grower and free bloomer. Sweetly scented. **\$75.00** per 100.

Portadown (McGredy, 1928). Messrs. McGredy are most enthusiastic in their praise of this deep crimson with velvety sheen which they describe as having large, full, beautifully formed flowers, reminding one in perfection of shape of Mrs. Henry Morse when at its best. Habit vigorous and bushy, a continuous free bloomer with dark green foliage. **\$75.00** per 100.

Portadown Bedder (McGredy, 1929). This is one of the brilliant Roses that makes an instant appeal by its charming combination of unusual colors. The petals are orange-yellow on the outside, with a rich cerise flush that deepens towards the edge, and inside there is a suffusion of glowing scarlet-cerise on an orange ground, the blend of colors giving a warm tone to the whole flower, which is of moderate size, good form and thick texture of petal. They are very freely and continuously produced and are fragrant. A Rose that has only to be seen to be admired. **\$75.00** per 100.

President Hoover (L. B. Coddington, 1930). A glorious Rose, wonderfully free in the easy manner in which it grows and charming in its color arrangement which is a splendid combination of cerise-pink, flame, scarlet and yellow; this combination of colors gives the most dazzling color effect imaginable. The buds are beautifully pointed, the flowers large, composed of broad thick heavy petals, with an exquisite fragrance. It is exceptionally free flowering and everyone will be delighted with its habit of growth. **\$100.00** per 100.

President Jac Smits (Verschuren & Sons, 1928). For brilliancy in color, a rich velvety crimson-scarlet, exceptionally long pointed buds of ideal shape, held gracefully on long stems and produced most generously, we know of no other variety that is its equal, but having only 18 to 20 petals, usually arranged in three rows, the flowers expand very quickly, showing the golden stamens, but even in its fully expanded form its brilliancy of color is unequalled by any other variety of this type. **\$50.00** per 100.

Rev. F. Page Roberts (Cant & Son, 1921). A Rose of remarkable beauty both in form and color. The long pointed buds are of a coppery-red stained red on the outside and open to good full double fragrant flowers of a golden-yellow particularly high colored in late summer and fall. The plant is of vigorous branching habit with beautiful foliage. A most distinct variety that has deservedly gained great popularity. **\$40.00** per 100.

Rosella Sweet (Pernet-Ducher, 1930). Large ovoid bud developing to a splendid large, well-formed, attractive flower of a luminous capucine yellow, with delicate salmon pink suffusion and of strong delicious fragrance. The fine flowers are borne singly on strong stiff stems, the plant is of vigorous upright habit with healthy dark green glossy foliage. **\$75.00** per 100.

New Hybrid-Tea Rose, President Hoover

Rudolph Valentino (Pernet-Ducher, 1929). Altogether different from any other Rose, both in coloring and formation, the very large full flower which is informally but artistically arranged, is of a lively shade of shrimp pink or coral-red with a golden coppery suffusion which is heightened by the reflection from the golden base and reverse of the petals. A most unique and striking flower in all stages of development. Habit strong and vigorous, free and continuous flowering and delicately scented. \$75.00 per 100.

Schwabenland (Pfitzer, 1928). A Rose of great merit. There are many pink Roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large, over five inches in diameter, of great depth, with high spiral centre, the petals having a peculiar twist or curl give the large bloom a most graceful appearance. In color it is a luminous rich rose pink, retaining its brightness until the petals drop; the flowers are carried singly on long stiff stems. A strong, healthy, hardy, vigorous grower and free and perpetual flowering. \$150.00 per 100.

Souvenir d'Alexander Bernaix (Bernaix, 1926). A beautiful large flower, 4½ inches or more in diameter and unique and distinct in color, one of the deepest colored Hybrid-Tea varieties. The flower is of artistic build and full double with from 48 to 50 substantial petals which are neatly arranged. In the half-expanded bud the petals are incurved, of an intense deep velvety crimson-red on a maroon ground with touches of scarlet on the outer petals. As the flower fully develops it becomes suffused with vermillion carmine at the edge of the petals. \$75.00 per 100.

Swansdown (Alex. Dickson & Sons, 1929). An ideal white which in the autumn has just a tint of cream at the base of the petals. The buds are large, very long pointed of perfect shape, composed of large heavy petals and develop into splendid full very sweetly-scented flowers of spiral formation. Its growth is vigorous. In freedom of flowering Messrs. Dickson state that they do not know any other Rose of its size that will produce flowers in such profusion. \$75.00 per 100.

Talisman (Montgomery Co., 1929). A combination of shadings of gold, apricot, yellow and deep pink or old-rose. The outside of the petals is bright yellow, gold, and pink; as the flower develops and the petals unfold they become bright apricot, gold, deep rose-pink or old-rose and unlike most Roses the color becomes brighter as the flowers develop. The bud is long, perfectly formed, averaging about 25 to 28 petals, the plant is a strong grower and free flowering. \$75.00 per 100.

Vaterland (Pfitzer, 1928). The most distinct dark colored variety yet introduced, deeper and richer in effect than the Hybrid Perpetual variety Prince Camille de Rohan, a rich deep velvety scarlet maroon and a splendidly formed high centered flower of remarkable keeping qualities. The plant is of vigorous strong erect habit with healthy foliage and remarkably free and perpetual flowering; unquestionably the best of this type that has yet come to our notice. \$150.00 per 100.

Ville de Paris (City of Paris) (Pernet-Ducher, 1926). One of Pernet-Ducher's Gold Medal Roses which award it received in the International trials at the Bagatelle Gardens, Paris, in the summer of 1926. It is of a rich buttercup-yellow much in the style of Mrs. Beckwith but with longer buds and larger flowers and purer in color. The plant is of vigorous growth and very free flowering, a splendid rich yellow garden variety. \$40.00 per 100.

W. E. Chaplin (Chaplin, 1929). A most meritorious red Rose of the Lord Charlemont type but better, being a free vigorous grower with healthy disease-resisting foliage. The flowers are large; every bud develops to a perfect full, high-centered, very lasting moderately sweet scented flower. Color deep crimson, deepening to carmine crimson; does not blue or burn; these are carried on long strong stems, a very free continuous bloomer. \$125.00 per 100.

William E. Nickerson (Easlea, 1928). Very attractive and distinct, a glowing orange cerise, large, ovoid buds, developing into full double high-centered flowers of perfect form; very lasting, moderately fragrant, borne singly on long strong stems. A hardy vigorous grower with light green healthy foliage. A free and continuous bloomer. A gem in every way. \$125.00 per 100.

In its habit of flowering it is as free as many of the popular Hybrid-Tea varieties, its seed parent is Frau Karl Druschki, from which it has inherited a strong, clean, vigorous growth; its buds are long and well formed of a pearly white color suffused with soft, salmony flesh and develop into large, full double imbricated flowers of splendid form which as they expand, show a golden apricot suffused centre. A gem in every respect. \$50.00 per 100.

New Hardy Climbing Roses

Chaplin's Pink Climber

Unquestionably the most important acquisition in climbing Roses since the introduction of Dr. Van Fleet and Paul's Scarlet Climber, universally recognized as the most popular climbing Roses, and to which Chaplin's Pink Climber will prove an equally valuable companion.

This striking novelty originated in the same nursery in which Paul's Scarlet Climber was raised. It is a cross between Paul's Scarlet and American Pillar, of strong growth, perfectly hardy, producing its large flowers, similar in size and form to Paul's Scarlet, profusely in strong trusses of from 8 to 12 flowers each, but in color a rich lively pink.

At the Spring Show of the National Rose Society of England in 1928, it was the outstanding feature among the new Roses and was awarded the Society's Gold Medal.

Strong two-year-old plants, \$60.00 per 100; \$500.00 per 1000.

Primrose, the New Yellow Rambler

In this we have what has long been sought after a real hardy yellow rambler a strong vigorous grower and hardy under the same conditions under which Dr. Van Fleet and similar varieties will succeed. In color light primrose-yellow which is maintained until the petals drop. Its flowers are borne in trusses of from 2 to 5, on long stems, about 2½ inches in diameter. The plant is of vigorous climbing habit, free flowering, mid-season and the flowers last in good condition for a long time, with healthy dark foliage.

Strong two-year-old plants, \$50.00 per 100; \$450.00 per 1000.

Mme. Gregoire Staechelin

Mme Gregoire Staechelin has inherited the best traits of both of its popular parents, Frau Karl Druschki and Chateau de Clos Vougeot. The long-pointed buds are crimson at first as the sepals divide, then the firm outer petals show splashes of carmine as the flower opens, with an iridescent pearl-pink inside, and it is richly perfumed.

It grows 12 feet or more and has large, disease-resistant foliage. The main stem of the plant shoots upright and the long bloom-spurs stand out 18 inches at right angles, with exquisite, full, fragrant blooms. These blooms come early in June and last over a long period.

Strong two-year-old plants, \$75.00 per 100; \$650.00 per 1000.

The New Climbing Polyantha Rose Climbing Lafayette or Auguste Kordes

A sport of the popular Bedding Polyantha Rose Lafayette, possessing all of the good characteristics of that desirable variety, but of a strong, vigorous, climbing habit, producing its good-sized, very attractive, bright crimson scarlet flowers very freely in large trusses. The plants are covered with bloom from top to bottom in early summer, with some intermittent periods of bloom during the late summer and fall. \$75.00 per 100.

New Climbing Rose Thelma

Similar in habit of growth to Paul's Scarlet Climber which is one of its parents. The flowers are large for this type of Rose, being 3 inches in diameter, usually with three rows of petals, produced in clusters of from 3 to 18 blooms, which last in good condition a long time. Color a delicate coral pink suffused with carmine. A Rose of special merit. \$60.00 per 100.

Climbing Roses of Special Merit

Albertine. Nicely shaped vermilion buds expanding to moderately double, perfect shaped flowers of a pleasing cameo-pink with silvery suffusion, sweetly scented; foliage rich deep, glossy green. \$60.00 per 100.

Trailing Rose, Max Graf

Trailing Hybrid-Rugosa Rose Max Graf

Makes an excellent pillar or climbing Rose, but will be found most valuable as a ground cover for which purpose it is far superior to any of the Wichuraiana varieties. The foliage resembles Rosa Rugosa, is retained very late in the season, it is practically immune to insects and diseases and is absolutely hardy. Its flowers are large, single, bright pink with prettily crimped petals. For planting on a steep bank or for trailing over a stone wall, it has no equal. \$50.00 per 100.

Hybrid-Rugosa Roses

Agnes. Coppery yellow buds and flowers turning to amber yellow as they develop, the only Rugosa of a yellow color. The flowers are of good size for this type, sweetly scented and produced freely in early summer. \$1.00 each.

As the season advances we can usually supply all of these varieties in pot plants with the ball of soil intact.

Bignonia Grandiflora

Actinidia Arguta (Silver Vine)

Strong two-year-old plants, \$7.50 per doz.

Actinidia Chinensis

A rare climber with large orbicular foliage of dark green on the upper surface, densely tomentose beneath and when young thickly covered with bright red hairs which gives it a beautiful velvety appearance. It bears attractive yellow flowers which are succeeded by edible fruit the size of a walnut, with gooseberry flavor. Hardy south of Washington. 75 cts. each; \$7.50 per doz.

Clematis Montana Undulata

(Anemone Clematis)

The illustration in colors in our retail catalogue for 1931 conveys a good idea of the attractive flowers of this gem among climbing plants. It is a strong vigorous grower, perfectly hardy, disease and insect proof and will succeed and flourish under the most adverse conditions. The Anemone or Wind-flower-like blooms are white flushed mauve pink, and are from 1½ to 2 inches in diameter and frequently begin to expand as early as the last week in April, just about the time when Wisterias have finished, continuing in bloom well through May, and are produced in great profusion. The best of the early spring-flowering climbers of which there are but few. 60 cts. each; \$6.50 per doz.; \$50.00 per 100.

Ampelopsis Lowi

A splendid variation from the popular Boston or Japan Ivy, possessing all the merits of the parent, being perfectly hardy, clinging to the smoothest surface without support, and with much smaller foliage, which is deeply cut, giving it a grace and elegance entirely distinct from the old type. In the spring and summer the leaves are a bright fresh apple-green color, changing in the autumn to various brilliant tones of orange, crimson and scarlet. 3-inch pots, \$4.00 per doz.

Ampelopsis Quinquefolia (Virginia Creeper)

Strong two-year-old field-grown plants, \$2.50 per doz.; \$20.00 per 100.

Japanese Flowering Cherry

Japanese Flowering Cherries

The display of Japanese Flowering Cherries at Washington, D. C., in early spring is one of the great sights of our national capital and annually attracts thousands of visitors.

These Cherries are among the earliest trees to flower, coming into bloom early in April. The different varieties, single and double, extend the flowering season for fully four weeks, the attractive single-flowered varieties coming into bloom first, followed by the double sorts. They are perfectly hardy, and will succeed in almost any location.

We offer eight of the choicest varieties, six erect growing and two weeping varieties, a selection made for us by one of the most experienced growers.

Erect Growing Varieties

Daybreak. One of the earliest to bloom, flowers single pink appearing before the leaves in greatest profusion.

Naden. One of the prettiest double pinks, the petals are so numerous as to make the flower a perfect tuft.

Pink Pearl. The earliest of the doubles. Flowers fully 1½ inches in diameter, light pink shading deeper at the edges; very free.

Takasago. Double light pink massed into large compact clusters, very showy, blooms before the leaves appear.

Ukon. Unique in having yellow flowers slightly tinted green, as the flowers mature the veins in the petals change to cerise; late flowering; semi-double.

Victory or Shirofugen. Very double, up to 2½ inches in diameter borne in racemes of about 3 each on long stems; flowers open a delicate pink changing to white; late flowering.

Price. Any of the above in strong plants 4 to 5 feet high \$2.50 each.

Weeping Varieties

Eureka Weeping (Japanese Weeping Rose Flowering Cherry). A single light pink that has been grown in this country for 50 years, a tribute to its beauty and popularity.

Park Weeping. Differs from the above in the color of its flowers which are of a deep pink and a stronger grower.

Price. Either of the above two weeping varieties on 4-foot stems, strong one-year-old heads \$3.50 each.

Daphne Cneorum (Garland Flower)

A pretty dwarf spreading Shrub from 6 to 8 inches high, valuable for the rockery or for the front of the border, producing beautiful bright pink, sweet-scented flowers early in May. Strong bushy plants 8 to 10 inches in diameter, \$1.00 each; \$10.00 per doz.

Golden Variegated California Privet

We offer a splendid lot of two-year-old plants, nicely trimmed, very bushy specimens, from 12 to 15 inches high, which, if potted in 6-inch pots, will make most valuable material for use in window or porch boxes and other plantings. \$3.50 per doz.; \$25.00 per 100.

We also offer three-year-old bushy plants, 24 to 30 inches high, \$4.50 per doz.; \$35.00 per 100.

One-year-old stock for lining out, 12 to 15 inches high, \$10.00 per 100; \$80.00 per 1000.

Kolkwitzia Amabilis (Beauty Bush)

An exceedingly handsome new ornamental Shrub from the wilds of China, resembling the Weigela and Honeysuckle to which it is allied. Growing 6 to 8 feet high at maturity, with long arching branches, this variety combines all the merits of a perfect Shrub; hardiness, year-round beauty of foliage and habit, and an amazing profusion of pale-pink bell-shaped flowers in June. Strong plants 18 to 24 inches high, \$6.50 per doz.; \$50.00 per 100.

Nandina Domestica (Chinese Bamboo)

A very handsome small Shrub, hardy as far north as Philadelphia; it grows about three feet high with graceful, light green foliage, which turns to a most attractive bronzy red early in the fall. The small white flowers are produced in good-sized erect panicles in spring and are followed by crimson berries. Strong 5-inch pots, 75 cts. each; \$7.50 per doz.

Pyracantha (Crataegus) Coccinea Lalandi (Firethorn or Evergreen Thorn)

There is no other fruiting evergreen Shrub that is so attractive throughout the year as this fiery Thorn, and which will succeed in any fairly sunny position, developing into a shapely plant 6 or more feet high; it may be planted either in connection with other Shrubs or as a single specimen or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter produce a gorgeous effect. Strong pot-grown plants 15 to 18 inches high, 75 cts. each.

Viburnum Carlesi

A rare Korean variety which is entirely distinct with salver-shaped flowers of a delicate rose tinted white, passing to white sweet-scented flowers produced in terminal subglobose cymes 2 to 3 inches in diameter, reminding one somewhat of a spray of Bouvardia. Good bushy specimens 2 to 2½ feet high, \$1.50 each.

Viburnum Rhytidophyllum

A rare variety, particularly attractive on account of its large dark green nearly evergreen foliage, the yellowish white flowers are followed in September by red berries finally turning black. 4-inch pots, 75 cts. each; 7-inch pots, \$1.50 each.

Vitex Macrophylla

In general habit similar to *V. Agnus Castus*, but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub.

Field-grown plants, one-year old, 15 to 18 inches high, \$2.50 per doz.; \$20.00 per 100.
